Course title: Final Paper	
Course code:	
ECTS credits: 4	
Requirements: Passed exams prescribed by the study program, conducted practical training with a turned-in and approved report, approved topic by the college department responsible for the field of choice to which the course belongs.	
Basic information	
Level of studies: Undergraduate applied studies	
Year of study: 3	
Trimester: 9	
Goal: Students will show the ability to apply theoretical and practical knowlegde acquired over the course of studies. The ability to independently use national and foreign literature, i.e. to put to use the knowledge, facts, and attitudes expressed in those sources.	
Outcome: Through the creation of the final paper, the student should master the theoretical framework of the given topic, the methodology of writing the final paper, the research and data processing methodology, get familiar with relevant national and foreign literature, and acquire the ability to theoretically and practically solve problems in the area of banking and business informatics.	
Contents of the course	
Theoretical instruction	
Practical instruction (Problem solving sessions/Lab work/Practical training)	
1. Student's independent research	
2. Getting familiar with the research methodology in the area of banking and business informatics, as well as in areas more closely connected to the chosen topic	
3. Preparation, writing, and defense of the final paper	
Textbooks and References	
Number of active classes (weekly)	
Lectures:	
Practical classes:	
Other types of classes: 20	
Grading (maximum number of points: 100)	
Pre-exam obligations: Points	

Quality of the final paper: 40
Presentation of the paper: 20
Activities on practical exercises:
Seminar work:
Colloquium:
Final exam: Points
Final paper defense: 40
