| Course title: Fundamentals of Programming 1 |
| :--- |
| Course code: 63043 |
| ECTS credits: 8 |
| Requirements: None |
|  |
| Basic information |
| Level of studies: Undergraduate applied studies |
| Year of study: 1 |
| Trimester: 2 |
| Goal: Introducing students to the basic principles of programming languages <br> (including structured programming, selection statements, loops, arrays, and <br> functions) and a specific application in C programming language. <br> Outcome: The student who successfully masters the requirements of the course will <br> be able to: <br> (1) design and program in C language, <br> (2) develop good programming skills, <br> (3) use modern C compiler and debugger and environment (Microsoft Visual <br> Studio). <br>  <br> Contents of the course <br> Theoretical instruction: <br>  <br> 1. Algorithms and flow diagrams <br> 2. Programming languages <br> 3. Numerical systems <br> 4. Structure of C program <br> 5. C character set <br> 6. Preprocessor in C <br> 7. Functions scanf() and printf() <br> 8. Operations and operators <br> 9. Expressions <br> 10. Branching instructions <br> 11. Loops <br> 12. Functions <br> The emphasis in theoretical instruction is on loops and branches in a program, <br> because without that any other instruction in terms of programming does not make <br> sense. After that, the course covers all the basic elements of C language and insists <br> on writing programs. |

|  |
| :--- |
| Practical instruction (Problem solving sessions/Lab work/Practical training) |
|  |
| 1. Students use a modern development environment (Microsoft Visual Studio) to <br> write and debug programs. <br>  <br> Textbooks and References <br>  <br> 1. Brian W. Kernighan, Dennis M. Ritchie, Programming Language C <br> 2. Laslo Kraus, Programming Language C with Solved Problems, Akademska misao, <br> Beograd, 2004. <br> 3. Clovis L. Tondo, Scott E. Gimpel, The C Answer Book: Solutions to the Exercises in <br> 'The C Programming Language,' <br> 4. Laslo Kraus, Solved Problems in programming language C, Akademska misao, <br> Beograd, 2005. <br> 5. Presentations from lectures and electronic and printed material for practical <br> classes. <br>  <br> Number of active classes (weekly) <br> Lectures:4 <br> Practical classes:4 <br> Other types of classes: <br>  <br> Grading (maximum number of points: 100) <br> Pre-exam obligations: Points <br> Activities during lectures: <br> Activities on practical exercises: <br> Seminary work: <br> Colloquium: 30 <br> Final exam: Points <br> Written exam: 70 <br> Oral exam: <br>  <br> Lecturer <br> Milorad Paskaš, PhD; Nenad Teofilović, MSc <br> Associate <br>  |
